

Junior-Mid Level Web Developer (PHP, SQL, CSS, JS)

Author:	Paul Veal
Date:	23 rd November 2022
Version:	V1.3

Admit One is a vibrant and growing technology company based in Dorset in the United Kingdom. Our software suite is used by customers across the globe, from the United States to New Zealand, with users on all five continents.

We service the Cinema, Theatre and Attractions market in all areas of technology including Admissions, Retail, Hospitality, Digital Signage, Web and Mobile apps, also referred to as Point of Sale or PoS.

Our platforms deliver innovative ticket booking and retail purchase solutions to our customers and are written using our proprietary 'booking scripts' which are an API layer for our POS software

Job Description

- Reporting to the Web Team Manager, the web team is a sub-team within the wider development department.
- Writing well designed, testable, efficient code by using best software development practices
- Creating website layout/user interfaces by using standard HTML/CSS practices
- Integrating data from various back-end services and databases
- Gather and refine specifications and requirements based on technical needs
- Create and maintain software documentation
- Be responsible for maintaining, expanding, and scaling our site
- Stay plugged into emerging technologies/industry trends and apply them into operations and activities
- Cooperate with web designers to match visual design intent
- Communicating efficiently and effectively with colleagues across different departments within the company as well as directly with customers

Qualifications and Experience

Prerequisite

- Demonstrable software development skills in a high-level object orientated web language (such as PHP)
- Demonstrable frontend skills - CSS styling and JavaScript
- SQL based database technologies, queries, stored procedures (MySQL, SQL Server, Oracle, PostgreSQL)
- A solid understanding of programming principles and development lifecycles
- a 'full stack' developer who is equally able to tinker 'under the hood' as well as produce visuals from designs provided both by our in-house design team and other parties.
- Knowledge and demonstrable experience in using MySQL, PHP, IIS, HTML, CSS, JS, Laravel and Tailwind
- Ability to write natively and as part of a framework
- Problem solving skills
- Good time management and ability to work to deadlines
- Ability to work in a team and independently, as projects dictate
- Strong communication skills

Desired

- Experience working with API concepts and XML/JSON data structures
- Knowledge of source control concepts, e.g. GIT, Bitbucket etc
- Knowledge of current, and upcoming Web, and Mobile App trends and technology
- Previous experience using online payment service providers and e-commerce
- Knowledge of integrating with on-line payment services providers and third-party technologies such as Google Analytics, Facebook, and other services using REST and other protocols.
- Able to demonstrate the ability to comfortably swap between projects, manage their time and tasks efficiently, and communicate effectively within the team

Package and Benefits

- 36.5hr average working week
- 30 days holiday p.a.
- Relaxed and casual work environment.
- Market rate salary, based on experience.
